

BILL OF MATERIALS SOFTWARE FEATURES

Features the ability to:

- * Set up bill of materials with parts (including sub-assemblies) and labor
- * Include set-up time and manufacturing comments
- * Add new products 'on-the-fly'
- * Add new bill of materials using similar bill as reference to save time
- * Print work orders with summary of materials required
- * Use non-stock items
- * Integrate with the Inventory Management System
- * See detailed sub-assemblies notation on-screen

Other features:

- Updates finished goods inventory when manufactured
- Unlimited parts in a bill
- Single or multiple phases to a bill
- Unlimited levels of sub-assemblies
- Commits raw materials for manufacturing
- On-line 'trial' build capability (requirements and shortages scenario) for material requirement planning
- Relieves raw materials when manufactured and updates finished goods inventory
- Calculates cost of items sold based on First In/First Out (FIFO)
